***Directed External Notice: Hexagon | NovAtel Announces End of Life
for commercial OEM7 hardware supporting High Speed***

NovAtel Inc. is announcing the End of Life of the following family of products:

Commercial OEM7 receivers with -H model

Commercial PwrPak7, PwrPak7D, GT7800, SPAN CPT7 enclosures with -H model

These products will be available for order until:

31 August 2021

Shipments may be scheduled for no later than:

30 June 2022

NovAtel will continue to repair and support these products until:

30 June 2023

What's Changing

Hexagon's A&P division continuously strives to provide a secure, robust solution across all our products. To ensure we meet today's cybersecurity demands, we are changing our current Commercial to Controlled-Goods upgrade process. We are moving to a multi-stream approach by offering a Commercial hardware platform stream and a separate Control-Good hardware platform stream of products. This approach will provide increased safety during shipping, and in use. The new High-Speed hardware variant will be identified by the new set of marketing part numbers (i.e. OEM719H-xxx-xxx-xxx-H). This new hardware naming clearly identifies the hardware platform, an OEM719H in this case, as being natively capable of high-speed data output. It is classified as Controlled-Goods right from the factory. The current marketing part numbers (i.e. OEM719-xxx-xxx-xxx-H) will be set to End of Life (EOL). The new High-Speed capable hardware will be Form Fit and Function compatible with the previous High-Speed hardware.

For a complete list of affected part numbers and the associated replacement part numbers, please refer to the table below:
