2 Reason for discontinuation

u-blox commits to introduce the latest technology and product portfolio to customers and to provide support tools to make evaluation and design efforts as simple as possible. Therefore, it is not recommended to use above mentioned legacy and old generation Evaluation Kits or Application Boards for new designs.

3 Recommendation

It is recommended that customers choose latest u-blox 8 / M8 support tools (Evaluation Kit or Application Board) for evaluating and testing the latest u-blox GNSS solutions. u-blox 8 and M8 platforms offer improved performance and versatile product portfolio compared with legacy Fastrax modules, older generations of u-blox 6 and u-blox 7 products. Please consult u-blox's support team for more migration related information.

4 Schedule

The EOL of above mentioned u-blox support tools take effect immediately. Last shipment till the current stock is depleted.

Important: All orders placed after this notification date are non-cancellable and non-returnable (NCNR)
