Product summary

MAX-M10 series

P

u-blox M10 standard precision GNSS modules

Ultra-low-power GNSS receiver for high-performance asset-tracking devices

- · Less than 25 mW power consumption without compromising GNSS performance
- Maximum position availability with concurrent reception of 4 GNSS
- Proven excellent performance, even with small antennas
- Advanced spoofing and jamming detection
- Pin-compatible with previous MAX products

9.7 × 10.1 × 2.5 mm

Product description

The MAX-M10 series is built on the ultra-low-power u-blox M10 GNSS platform, which provides exceptional sensitivity and acquisition times for all L1 GNSS systems.

The extremely low power consumption of less than 25 mW in continuous tracking mode allows great power autonomy for all battery-operated devices, such as asset trackers, without compromising on GNSS performance.

MAX-M10 supports concurrent reception of four GNSS (GPS, GLONASS, Galileo, and BeiDou). The high number of visible satellites enables the receiver to select the best signals. This maximizes the position availability, in particular under challenging conditions such as in deep urban canyons.

u-blox Super-S technology offers great RF sensitivity and can improve the dynamic position accuracy by up to 25% with small antennas or in a non-line-of-sight scenario.

The MAX-M10S module integrates an LNA followed by a SAW filter in the RF path for maximum sensitivity in passive antenna designs. MAX-M10M offers a cost and power optimized setup without LNA and SAW filter.

MAX-M10 detects jamming and spoofing attempts and reports them to the host, so that the system can react to such events. Advanced filtering algorithms mitigate the impact of RF interference and jamming, thus enabling the product to operate as intended.

Both modules offer backwards pin-to-pin compatibility with previous u-blox generations, which saves designers time and cost when upgrading their designs.

Package

18 pin LCC (Leadless Chip Carrier): 9.7 × 10.1 × 2.5 mm, 0.6 g

Environmental data, quality & reliability

| Operating temp. | -40 °C to +85 °C |
|-------------------------------------|--|
| Storage temp. | -40 °C to +85 °C |
| Environmental grade | 2015/863/EU RoHS-3 |
| EMC (electromagnetic compatibility) | 2014/53/EU RED |
| Environmental testing | ISO 16750 |
| Quality management | Manufactured and fully tested in IATF 16949 certified production sites |

Interfaces

| Serial interfaces | 1 UART 1 DDC (I2C compliant) |
|--------------------|---|
| Digital I/O | Configurable timepulse 1 EXTINT input for Wakeup |
| Raw Data output | Code phase data |
| Timepulse | Configurable: 0.25 Hz to 10 MHz |
| Supported antennas | Active and passive |
| Protocols | NMEA 4.11, UBX binary |
| | |

Compatible u-blox location services

| - | |
|-------------|--|
| AssistNow | Real-time online A-GNSS service with assured global availability |
| CloudLocate | Extends the life of energy-constrained IoT applications |

Support products

| EVK-M101 | u-blox M10 GNSS evaluation kit with UBX-M10050-KB chip and TCXO |
|------------|---|
| EVK-M101C | u-blox M10 GNSS evaluation kit with UBX-M10050-KB chip and crystal oscillator |
| u-center 2 | Highly intuitive software for GNSS performance evaluation |

Product variants

| MAX-M10M | u-blox M10 concurrent GNSS LCC module, firmware in ROM, crystal oscillator |
|----------|--|
| MAX-M10S | u-blox M10 concurrent GNSS LCC module, firmware in ROM, SAW filter, LNA, TCXO |
