

V-Band Near Field Probe

50 to 75 GHz, WR15

DESCRIPTION

The NFP-40-WR15 is a high-performance open-ended waveguide probe that operates at the X-band between 50 and 75 GHz. It is manufactured from a single aluminium rod by high accurate manufacturing processes. The opening is sharp to reduce/minimize reflections.

Under client request, all NFPs can include adequate absorber material to reduce backscattering reflections from flanges.

APPLICATIONS

This type of probes is especially suitable for laboratory antenna near field measurements. Moreover, custom bands and radiation pattern data can be requested for probe correction purposes.

Anteral also offers their **CATR** (Compact Antennas Test Range) for measuring antennas at such antenna test facilities.
