

Near Field Probe

260 to 400 GHz, WR2.8

DESCRIPTION

The NFP-15-WR2.8 is a high-performance open-ended waveguide probe that operates at the X-band between 260 and 400 GHz. It is manufactured from a single aluminium rod by high accurate manufacturing processes. The opening is sharp to reduce/minimize reflections.

Under client request, all NFPs can include adequate absorber material to reduce backscattering reflections from flanges.

APPLICATIONS

This type of probes is especially suitable for laboratory antenna near field measurements. Moreover, custom bands and radiation pattern data can be requested for probe correction purposes.

Anteral also offers their **CATR** (Compact Antennas Test Range) for measuring antennas at such antenna test facilities.
