

Q-Band Near Field Probe

33 to 50 GHz, WR22

DESCRIPTION

The NFP-60-WR22 is a high-performance open-ended waveguide probe that operates at the X-band between 33 and 50 GHz. It is manufactured from a single aluminium rod by high accurate manufacturing processes. The opening is sharp to reduce/minimize reflections.

Under client request, all NFPs can include adequate absorber material to reduce backscattering reflections from flanges.

APPLICATIONS

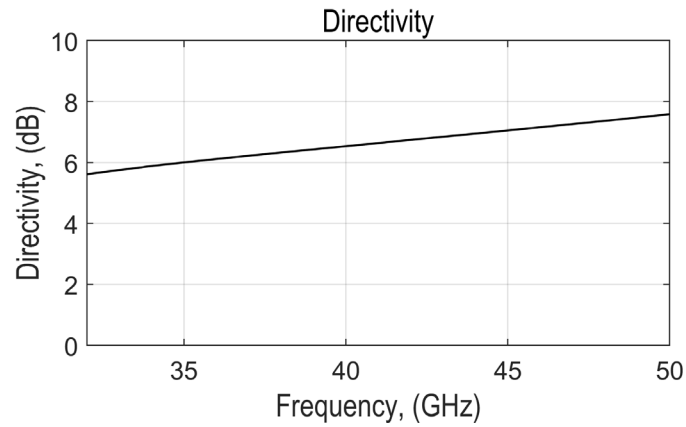

This type of probes is especially suitable for laboratory antenna near field measurements. Moreover, custom bands and radiation pattern data can be requested for probe correction purposes.

Anteral also offers their **CATR** (Compact Antennas Test Range) for measuring antennas at such antenna test facilities.

ELECTRICAL SPECIFICATIONS

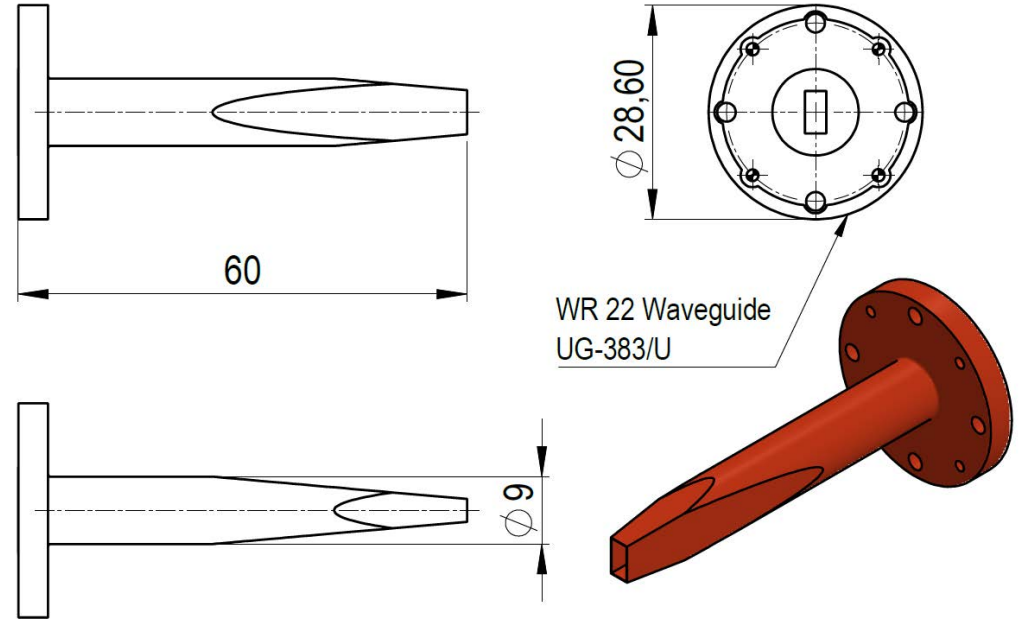

Parameter	Typical
Frequency	33 - 50 GHz
Directivity	6.5 dBi
S11	-13 dB

MECHANICAL SPECIFICATIONS

Parameter	Description
Antenna Port	WR-22 (5.690 mm x 2.845 mm)
Flange	UG-383/U
Total length	60 mm
Horn Material	Aluminum

MECHANICAL OUTLINE

Additional notes

The return loss performance of all items is checked before delivery.
